

PERMANENT CROWN SEAT-POST OPERATIVE INSTRUCTION

- Your new crown is now fit for chewing after approximately 30 minutes
- Please brush and floss the new crown as you do with your other teeth.
- You can still get decay under a crown if proper oral hygiene is not performed.
- The crown can be sensitive to temperatures for 4 weeks. Please let us know if the sensitivity increases after the 4 weeks.
- If you should notice the bite being a little off or high when chewing, please call our office to have this corrected with a simple bite adjustment.
