

## **CROWN PREPARATION AND POST OPERATIVE INSTRUCTIONS**

- Please do not chew on the temporary crown for approximately 30 mins.
- The gums around the tooth may be sore for 1-2 weeks following procedure. Advil or Tylenol is the best to take if this does occur.
- With the temporary crown, please refrain from chewing anything chewy or sticky on that side (gum, taffy) Also, please avoid eating popcorn or nuts during this period.
- If the temporary crown does happen to fall off. You can leave it off if there is no sensitivity.
- If the tooth is sensitive and you would like it back on, please call the office and we will put the temporary back on.
- Please brush the temporary like your other teeth. But avoid flossing around the temporary.
- Please return to your appointment date to have the final finished crown cemented.
